

# Call for Innovations: Showcase your project in the DUT Innovation Portfolio!

Attention to all **DUT projects with a project finish before the end of Q1 2027**: it is time to showcase your most promising results for increased impact. In April, we will launch a survey to collect information and identify the most promising **Driving Urban Transition Innovations (DUTIs)** to be featured in our upcoming Innovation Portfolio.

## What is a DUTI?

A DUT Innovation is a practical, innovative solution enabled by the DUT partnership that directly contributes to a **climate-neutral and resilient urban future**. We are looking for solutions with high scaling or replication potential that serve a **practical use** for urban stakeholders rather than a purely academic purpose. This can include:

- New methods, processes, or practices.
- Innovative business, governance, or collaboration models
- Technologies, digital tools, or infrastructures.

## Why participate?

The Innovation Portfolio is a flagship instrument that showcases how local authorities and municipalities, businesses, and citizens translate global strategies into local actions with an impact on the ground. Starting in **2026**, selected DUTIs will:

- **Receive an award** at the Final Project Event, where winners will present their solutions
- Be showcased **on the DUT website** to increase the visibility of transferable solutions.
- Be integrated into DUT's strategic **dissemination and replication activities**.
- Pitch their solutions to **European cities in the DUT City Panel**.

## Selection Criteria

Submissions will be evaluated based on **relevance** to current urban challenges, **usability** for urban stakeholders, **novelty**, and potential for **replication and scaling**.

**The survey will be launched via email to all Project Leads in April 2026.** Don't miss this opportunity to showcase your results. Ensure they are adopted by the stakeholders who need them most!
